

Feldkirch, July 2016

EC Declaration of Conformity
Declaration about Registration, Evaluation, Authorization
and Restriction of Chemicals (REACH) according to EU Directive 1907/2006

pro-ca herewith informs about the latest update on the REACH regulations. On October 2008, ECHA has published the first "Candidate List" of substances of very high concerns SVHC. Till today various substances are added to the Candidate List for authorization.

Ours suppliers are obliged to inform us if any of these SVHC substances are present in any item at > 0.1%. So far no substances of the Candidate List were reported and therefore pro-ca can confirm that their products do not contain any of the substances mentioned in the current valid candidate list. Once new information is received an update will be made accordingly.
